SUMMARY

Final-year Information Technology student focused on backend and full-stack development – REST API design, relational and document data modelling, and owning projects from build through testing and deployment. Works across Python, Java, JavaScript and SQL.

EDUCATION

Bachelor of Engineering in Information Technology, Vasavi College of Engineering Expected 2027
CGPA: 7.22/10

Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering, Web Technologies

BS in Data Science, IIT Madras 2024 – Present

Relevant Coursework: Statistics, Python Programming, Data Analysis

Intermediate (MPC), Sri Chaitanya Junior Kalasala – 87.7% 2021 – 2023

Secondary School Certificate (SSC), Bala Karthikeya High School – GPA 10/10 2021

SKILLS

Languages : Python, Java, JavaScript, C, C++, SQL, HTML5, CSS3

Backend & Web : Flask, Node.js, React.js, REST APIs, Bootstrap

Databases : MySQL, MongoDB – schema design, joins, indexing, query optimization

Cloud Platforms : AWS (EC2, S3, Lambda, RDS, DynamoDB), Azure, GCP, OCI

ML / AI : Scikit-learn, TensorFlow, PyTorch, OpenCV, YOLOv8, MediaPipe, NLP

Testing & Tools : Git, GitHub, Postman, JMeter, Jira, VS Code, Linux

Soft Skills : Problem Solving, Team Collaboration, Communication, Adaptability, Time Management

PROJECTS

DeepFit AI – Sports Talent Assessment Platform (Flask, MongoDB, YOLOv8, MediaPipe, OpenCV, Kotlin): Built the Flask REST API and MongoDB schema for athlete profiles, video submissions and per-rep scoring across 4 fitness tests. Implemented pose-keypoint rep counting with joint-angle validation, live form-quality feedback, and liveness checks to reject tampered submissions. Shipped web and Android prototypes with offline capture. Awarded 2nd Prize, CBIT Project Expo 2026.

CrowdGuard – AI Crowd Risk Management (Flask, YOLO, OpenCV, PyTorch, MongoDB): Designed a two-server architecture separating ML inference from video streaming, exposing 8 REST endpoints for camera management, MJPEG streaming and analysis history. Implemented density-based risk classification, grid-based hotspot detection, and camera-failure fallback with 5-second reconnect. Sustained 4 concurrent streams at 15 FPS with sub-500ms API response. Validated with unit, functional and JMeter load testing; defects tracked in Jira.

SiteLens – Website AI-Readiness & Engagement Auditor (Python, requests, BeautifulSoup4, lxml): Architected 6 composable audit modules behind a single orchestrator over a shared engine, auditing any website for crawler reachability, structured data, accessibility, freshness and on-site engagement. Built the crawl layer with connection pooling, retry backoff and robots.txt enforcement. Implemented 7 cross-page aggregation checks over a 20-page sample with deterministic JSON output, under a 2-minute runtime budget.

ACHIEVEMENTS

- Won 3rd Prize, Meta Composite Coding Competition, IIT Kharagpur (2025)
- Qualified Round One, TCS CodeVita Season 13 (2025)
- Won 2nd Prize, CBIT Project Expo (2026)

LEADERSHIP

- Demonstrated leadership through the successful development and deployment of full-stack projects, taking ownership from conception to implementation.
- Active NSS volunteer, engaged in social awareness programs, blood donation drives, and rural development activities.

ADDITIONAL INFORMATION

- **Languages:** English (Fluent), Telugu (Native), Hindi (Intermediate)
- **Interests:** Backend Engineering, Cloud Computing, Competitive Programming
